**PROPOSED CONSTRUCTION OF REDHOUSE CHELSEA ARTERIAL AND
 EXTENSION OF WALKER DRIVE, PORT ELIZABETH, WITHIN THE NELSON
 MANDELA BAY MUNICIPAL AREA.**

Refer to the Scoping Report and Plan of Study for Environmental Impact Assessment dated September 2010 and October 2010 respectively, and received in the Department on 11 November 2010. Please be advised that the Department has reviewed the Scoping Report and Plan of Study for EIA and hereby accepts the Scoping Report and the Plan of Study for EIA. The Department hereby gives notice that the EIA may commence.

However, DEDEA requires that the assessment of the bridge sites as well as alternative routing of the arterial is addressed extensively in the EIR, especially from the *Cyclopia* bridge to the connection to Walker Drive Extension, in order to minimise the impact on the rocky outcrop in that area. However it is recommended that DEDEA, Terratest and the NMBM have a meeting to confirm an acceptable routing prior to the submission of the Final EIR. It is also imperative that the design alternatives of the on- and off-ramps for the N2 Bridge Overpass are assessed and the impacts thereof fully described.

Furthermore, specific attention must be given to the possible impacts that increased stormwater run-off and the various design options (bridge vs. culvert vs. pipes) for the *Cyclopia* "bridge" will have on the *Cyclopia* populations, in lieu of their requirements in terms of the geohydrological regime.

It is trusted that you find the above in order.

ANDRIES STRUWIG
